

2019 New Mexico QSO Party Form Packet

Last modified: March 12, 2019

(Please be sure to download latest revision prior to start of NMQP)

2019 Change log:

- 12 March:
 - *Initial release*
 - Clarified that, for reasons of safety and access, contacts made within 200 feet of a county line are considered valid for county line operations.

2019 New Mexico QSO Party Rules

1. Object:

- a. Stations inside New Mexico work anyone in as many New Mexico counties, states, Canadian provinces, and DX entities as possible. Stations outside New Mexico work only New Mexico stations in as many New Mexico counties as possible.

2. Contest Period:

- a. The second Saturday of April 8:00 am MDT (1400 UTC) through 8:00 pm MDT (0200 UTC). Contest duration is 12 hours. Participants may operate for the entire duration of the contest.

3. Contest Bands & Suggested Frequencies

- a. Contest bands: 160, 80, 40, 20, 15, 10, and 6 meters
- b. Contacts on WARC bands, 60 meters, and bands *above* 6 meters are not permitted
- c. Suggested frequencies (on or near):
 - i. CW: 1820, 3550, 7045, 14050, 21050, 28050 kHz and 50.095 MHz
 - ii. Phone: 1850, 3815, 7260, 14280, 21380, 28380 kHz and 50.130 MHz
 - iii. Digital: Around each mode's customary calling frequencies
 - iv. **New Mexico stations, especially mobiles, are encouraged to congregate on or adjacent to the above frequencies at the top of each hour.**

4. Contest Modes

- a. SSB, CW, digital (any computer-to-computer mode is considered digital)

5. Classes

- a. **Single Operator.** One person performs all operating and logging functions. Only one (1) transmitted signal on the air at any time. All transmitters, receivers, and antennas must lie within a 500-meter circle. This includes portable (non-mobile) stations. The use of assistance or nets (DX-alerting nets, packet, internet, multi-channel decoders such as CW Skimmer, etc.), using non-Amateur Radio means of communication to solicit contacts during the event period, self-spotting, and requesting to be spotted is *not* permitted.
- b. **Multi-Operator.** More than one person performs operating or logging functions. Only one signal per band per mode allowed at any time. All transmitters, receivers, and antennas must lie within a 500-meter circle. This includes portable (non-mobile) stations. The use of assistance or nets (DX-alerting nets, packet, internet, multi-channel decoders such as CW Skimmer, etc.) *is* permitted. The use of non-Amateur Radio means of communication to solicit contacts during the event period, self-spotting, or requesting to be spotted is *not* permitted. Multioperator stations should use a single name as part of its exchange throughout the entire contest.
- c. **Mobile.** Consistent with County Hunter rules (<http://marac.org/awards.pdf>), "making contacts using a radio in or on a movable vehicle is a Mobile Operation. The vehicle does not have to be in motion. The radio must be powered by the vehicle or other power source that is contained in the vehicle and which is independent of all commercial or other outside power sources. The vehicle must be capable of movement without having to disconnect any wiring or antennas in order to move to another location. Examples of vehicles that are capable of mobile operation include automobiles, trucks, RVs, trains, bicycles, airplanes, and buses." All operations occur within the same vehicle. There are two classes of mobile operation.
 - i. **Single Operator.** Only one person performs all operating and logging functions. *A dedicated driver is encouraged to maximize safety.* The use of

assistance or nets (DX-alerting nets, packet, internet, multi-channel decoders such as CW Skimmer, etc.), using non-Amateur Radio means of communication to solicit contacts during the event period, self-spotting, and requesting to be spotted is *not* permitted.

- ii. **Multi-Operator.** More than one person performs operating or logging functions. *A dedicated driver is encouraged to maximize safety.* The use of assistance or nets (DX-alerting nets, packet, internet, multi-channel decoders such as CW Skimmer, etc.) *is* permitted. The use of non-Amateur Radio means of communication to solicit contacts during the event period, self-spotting, or requesting to be spotted is *not* permitted. Multioperator stations should use a single name as part of its exchange throughout the entire contest.

6. Exchange

- a. New Mexico stations: Name and New Mexico county
- b. Non-New Mexico stations: Name and State/Province/DXCC entity

7. QSO Points

- a. Each complete Phone contact is worth **1 point**
- b. Each complete CW contact is worth **2 points**
- c. Each complete Digital contact is worth **2 points**

8. Multipliers / Bonuses

- a. **Power Multipliers** (the highest output power used at any point during the contest determines your reported power multiplier)
 - i. QRP: 5 watts output or less: **x5**
 - ii. Low Power: > 5 to 150 watts output: **x2**
 - iii. High Power: Greater than 150 watts output: **x1**
- b. **Location Multipliers for New Mexico participants**
 - i. Multiply QSO points by total of each different NM county worked (up to 33), states worked (up to 50), Canadian provinces worked (up to 13; see below) and DXCC entities worked.
 - 1. Alaska and Hawaii count as state multipliers only; District of Columbia (DC) counts as Maryland.
 - 2. United States and Canada do not count as DXCC entity multipliers.
 - 3. Each multiplier may be counted **ONLY ONCE**, regardless of mode or band.
 - ii. List of Canadian Provinces: Alberta (AB), British Columbia (BC), Manitoba (MB), New Brunswick (NB), Newfoundland-Labrador (NL), Nova Scotia (NS), Ontario (ON), Prince-Edward Island (PE), Quebec (QC), Saskatchewan (SK), Northwest Territories (NT), Nunavut (NU), Yukon Territories (YT)
- c. **Location Multipliers for Non-New Mexico participants**
 - i. Multiply QSO points by total of each different NM county worked (up to 33).
 - ii. Each multiplier may be counted **ONLY ONCE** regardless of mode or band.
- d. **Mobile operations bonus (for New Mexico mobile stations only)**
 - i. Add an additional 5,000 points to the final score for every county from which at least 15 valid QSOs were made.

9. Scoring

- a. **For non-mobile participants:**
Total = Sum of QSO points from all bands **x** power multiplier **x** location multiplier
- b. **For mobile participants:**
Total = (Sum of QSO points from all bands and counties operated from **x** power multiplier **x** running total of location multipliers) **+** Mobile operation bonus

(For example, if you work GA, NC, and BER from one county, and BER, IN, OH from the next county you operate from, your running total of location multipliers is five [5]. BER may only be counted as a multiplier once.)

10. Miscellaneous

- a. Stations may be worked only once *per mode, per band*.
- b. Complete exchange information must be received by each station for a complete QSO.
- c. All contacts must be made without the assistance of intermediary stations, such as repeaters, digipeaters, satellites, etc.
- d. County lines are defined as per County Hunter rules (<http://marac.org/awards.pdf>).
- e. A New Mexico mobile station that travels into a new county is considered to be a new station and may be contacted again for point and multiplier credit. A New Mexico mobile station that travels into a new county may contact other stations again for point credit (however multipliers may still only be counted once).
- f. Consistent with County Hunter rules (<http://marac.org/awards.pdf>), "a stationary mobile may operate on a County Line and contacts with the mobile can be used as credit for both counties." *For reasons of safety and access, contacts made within 200 feet of a county line are considered valid for county line operations.* Furthermore, "only one County Line at a time can be run for [New Mexico QSO Party] credit. If the mobile is operating from the intersection of three or more USA Counties, only two counties at a time may be counted for the same contact."

11. Special Categories and Awards

- a. **High Score – New Mexico Club award.** A plaque, if sponsored, will be awarded to the New Mexico amateur radio club that achieves the highest aggregate score based on the scored logs submitted by its participating members. For a club to earn credit towards this award, the organization's name must be noted clearly within the paper or electronic log submitted. A participant wishing to extend credit for this award may list only one (1) New Mexico club in their log, and he/she must be a member in good standing of that club at the time of the QSO Party.
- b. **Most Counties Activated by a New Mexico Club award.** A plaque, if sponsored, will be awarded to the New Mexico amateur radio club that achieves the highest aggregate number of counties activated, based on the counties that its participating members activate in the course of the event, as recorded in their submitted logs. A minimum of 15 QSOs must be made from a given county in order to be counted as credit towards this award. For a club to earn credit towards this award, the organization's name must be noted clearly within the paper or electronic log submitted. A participant wishing to extend credit for this award may list only one (1) New Mexico club in their log, and he/she must be a member in good standing of that club at the time of the QSO Party.
- c. **New Mexico Expedition Category.** This special category encourages operators to activate New Mexico counties using Field-Day-style operations, with a station assembled and operated specifically for the New Mexico QSO Party.
 - i. This category is distinct from mobile operations, in that contacts are made from a portable (non-mobile) station that is set up specifically for the New Mexico QSO Party. Any non-mobile station within New Mexico may participate in this category.
 - ii. This is a special category, not a new operating class (as defined in Section 5 above). Stations participating in the expedition category must still operate and submit their log as a single-operator or multi-operator class operation. Stations will still be ranked among other single-operators or multi-operators in the event, however they will also be ranked among other expedition participants.
 - iii. Stations wishing to participate in the expedition category must clearly note "Expedition Station" or equivalent on their logs and/or summary sheet. Those

submitting electronic logs should make this note in the “soapbox” field of the Cabrillo file.

- iv. The use of existing stations, radio facilities, and permanently installed antennas, either amateur or commercial, are not permitted in this category.
 - v. All equipment used in the expedition category must be powered by a source that is independent of the power mains. Generators, batteries, solar panels, fuel cells, wind generators, and radioisotope thermal generators are all examples of power sources that can be used in this category.
 - vi. All transmitters, receivers, and antennas must lie within a 500-meter circle. See Single Operator and Multi-Operator class rules, as appropriate, for transmitted signal limitations.
 - vii. Similar to County Hunter rules (<http://marac.org/awards.pdf>), an expedition station may operate on a County Line and contacts with the expedition station can be used as credit for both counties. *For reasons of safety and access, contacts made within 200 feet of a county line are considered valid for county line operations.* Furthermore, only one County Line at a time can be run for New Mexico QSO Party credit. If the expedition station is operating from the intersection of three or more USA Counties, only two counties at a time may be counted for the same contact.
 - viii. At least 30 QSOs must be made to qualify as a valid expedition operation.
 - ix. The entire expedition station may be disassembled, moved, and reassembled within another county or county line during the event, provided the minimum number of required QSOs is met in order to qualify as a valid expedition at each location.
- d. **High Score – QRP award.** A plaque, if sponsored, will be awarded to the highest scoring New Mexico single-operator QRP participant.

12. Reporting

- a. Cabrillo formatted electronic logs. A list of known logging applications that support the proper New Mexico QSO Party Cabrillo template is available on the New Mexico QSO party website at www.newmexicoqsoparty.org. Electronic logs must be submitted in proper Cabrillo format (template included below); **electronic logs that are incomplete not in proper Cabrillo format, or late will be counted only as check logs.**
- b. Paper logs. Valid paper logs must include (a) a completed check sheet; (b) completed logsheets; and (c) a completed summary sheet. Only forms provided on the New Mexico QSO party website at www.newmexicoqsoparty.org will be accepted. Writing must be legible; **incomplete, illegible, or late logs will be counted only as check logs.**
- c. Participant logs must be received via email or postmarked **no later than April 27, 2019** (two weeks following the event).
- d. Electronic logs should be emailed to logs@newmexicoqsoparty.org
- e. Paper logs should be submitted via postal mail to:

**New Mexico QSO Party
c/o Valencia County Amateur Radio Association
P.O. Box 268
Peralta, NM 87042**

- f. NMQP will strive to post final results on the New Mexico QSO Party website in the June timeframe.

13. Awards and Participant Certificates

- a. Plaques will be awarded to first place winners of various categories. Winning Multi-Op teams will receive a single plaque on behalf of their team. If a plaque for a particular category does not have a sponsor by the time logs are scored, a color certificate will be

- awarded instead. A list of available awards and sponsors is provided at www.newmexicoqsoparty.org. Sponsorship of awards may be changed at the discretion of the New Mexico QSO Party organizers based on contest category entries.
- b. Special awards may be made at the discretion of the New Mexico QSO Party organizers.
 - c. Participants may purchase a participant certificate for \$3.00 payable by cash or check written to "**Valencia County Amateur Radio Association**" (funds cover certificate, color printing, envelope, and postage).
 - i. A valid log entry (either electronic or paper) containing *a minimum of 20 QSOs* must be submitted to be eligible for a participant certificate.
 - ii. If submitting a paper log, please include payment with your paper log submission.
 - iii. If submitting an electronic log, payment must be received at the mailing address provided above not later than the log submission deadline.
 - iv. Ensure that your name and callsign are clearly identified with your payment.
 - v. Unless otherwise requested, the name(s) printed on the certificate will be identical to the name(s) reflected in paper/electronic logs.

14. New Mexico QSO Party Participation Agreement

- a. By participating in the New Mexico QSO Party, you ("participant") agree to be bound by the provisions, as well as the intent, of these rules, the regulations of your licensing authority and the decisions of the New Mexico QSO Party organizers. Further, participant agrees to indemnify and hold harmless the New Mexico QSO Party, its organizers, and sponsors from any claim or consequence resulting from any activity associated with participating in the New Mexico QSO Party. By engaging in any form of participation in the New Mexico QSO Party, participant acknowledges and agrees to abide by this agreement.

New Mexico QSO Party Cabrillo Log Format

Log developers: Please utilize the following template to support the New Mexico QSO Party:

```

-----INFO SENT----- -----INFO RCVD-----
QSO:  FREQ  MO DATE      TIME CALL      NAME      QTH  CALL      NAME      QTH
QSO:  ***** ** YYYY-MM-DD NNNN ***** ***** ***** ***** *****
QSO:  14060 PH 2011-04-09 1811 KB5SXB/M  EDWARD   SAN  W5RMY     PATRICK   BER
    
```

- All QSO data should be space delimited for proper parsing.
- Cabrillo version 2.0 or 3.0 welcome.
- All dates/times are in UTC
- Modes are PH, CW, or RY. Use RY to designate all digital modes.
- QTH is three letter NM county abbreviation, or two-letter State/Province abbreviation, or "DX".
- The ARRL-SECTION: tag (Cabrillo v2.0) and LOCATION: tag (Cabrillo v3.0) is used to identify New Mexico stations for proper automated log checking and scoring. Cabrillo logs generated for New Mexico stations should reflect ARRL-SECTION: NM or LOCATION: NM. Cabrillo logs generated for non-NM stations should reflect their respective location (example: ARRL-SECTION: EPA, LOCATION: PA, LOCATION: DX etc.).
- Cabrillo log filenames are **call.log**, where "call" is the NMQP participant's callsign.

2019 New Mexico QSO Party Summary Sheet

NOTE: Participants submitting paper logs must include this form with county checksheet and logs

Call: _____ Name: _____

Address: _____

City, State/Province, Postal code: _____

Your email address (should we have questions): _____

County (*for NM stations only*): _____

Club (*for NM stations only*): _____

Entry Class

- Single Operator
- Multi-Operator
- NM Mobile, Single-Operator
- NM Mobile, Multi-Operator

Power Class (Check highest power used at any time during event)

- QRP (5 watts or less)
- Low Power (>5 – 150 watts)
- High Power (Greater than 150 watts)
- New Mexico Expedition Category (*review rules carefully*)

Scoring

_____ Phone QSOs x 1 point each = _____ points

_____ CW QSOs x 2 points each = _____ points

_____ Data QSOs x 2 points each = _____ points

_____ **total QSO points**

Multipliers

Power (Enter multiplier corresponding to the highest power used at any time during event)

QRP (5W or less) = 5 _____

Low Power (>5W – 150W) = 2 _____

High Power (Greater than 150W) = 1 _____

_____ **power multiplier**

For Non-New Mexico Stations

New Mexico counties: _____ (33 maximum)

For New Mexico Stations

New Mexico counties: _____ (33 maximum)

States: _____ (50 maximum; DC counts as Maryland)

Canadian Provinces: _____ (up to 13; see rules)

DX entities* : _____

* Hawaii and Alaska count only as **state** multipliers. USA and Canada **do not** count as DX entity multipliers.

_____ **total S/P/C multipliers**

2019 New Mexico QSO Party Summary Sheet

NOTE: Participants submitting paper logs must include this form with county checksheet and logs

Mobile Operation Bonus Points (for NM stations only; does not apply to non-mobile participants)

Number of counties within which you made 15 or more NMQP QSOs: _____

Multiply number of counties listed on previous line by 5,000: _____

_____ **total mobile bonus points**

Final Score

For non-mobile participants only:

Total QSO points _____ x Power multiplier _____ x Total S/P/C multipliers _____

= _____
(Total Score)

For mobile participants only:

(Total QSO points _____ x Power multiplier _____ x Running total of S/P/C multipliers

_____) + Total Mobile Operation Bonus Points _____

= _____
(Total Score)

Request your New Mexico QSO Party Participant Certificate

Review New Mexico QSO Party rules for details (minimum QSO requirement, payment info, etc.).

I have reviewed the NMQP rules and wish to purchase a NMQP participant certificate.

Name as you wish for it to appear on participant certificate (you may specify a club name; use additional space below if purchasing certificates for multiple operators):

Quantity of certificates to be purchased: _____ x \$3.00 each

Total amount included for certificate(s): \$ _____

New Mexico QSO Party Participant Agreement

By participating in the New Mexico QSO Party, you ("participant") agree to be bound by the provisions, as well as the intent, of these rules, the regulations of your licensing authority and the decisions of the New Mexico QSO Party organizers. Further, participant agrees to indemnify and hold harmless the New Mexico QSO Party, its organizers, and sponsors from

2019 New Mexico QSO Party Summary Sheet

NOTE: Participants submitting paper logs must include this form with county checksheet and logs any claim or consequence resulting from any activity associated with participating in the New Mexico QSO Party. By engaging in any activity associated with participating in the New Mexico QSO Party, participant acknowledges and agrees to abide by this agreement.

Paper log submission

Paper logs, which must include this summary sheet and county checksheet, may be submitted via postal mail to:

**New Mexico QSO Party
c/o Valencia County Amateur Radio Association
P.O. Box 268
Peralta, NM 87042**

***Logs must be postmarked no later than April 27, 2019 (two weeks following the event).
Incomplete, illegible, or late logs will be counted only as check logs.***

Thank you for participating in the New Mexico QSO Party!
